CLOUDHUB OVERVIEW

CloudHub Front View

CloudHub Rear View

CloudHub Underside View

Your Cloud9 CloudHub is supplied with:
1 X AC Power Supply
1 X Power Cord
1 X USB-C to USB-A 2M Cable *(This is for connecting your CloudHub to your **Windows-based** PC/Laptop)*

Optional Extras for your CloudHub are:
Cloud9 Gooseneck Microphone
Cloud9 Handset PTT or PTM *(With built-in Toggle Switch and Volume Roller)*

POWER SUPPLY INSTALLATION

1. Install the power supply connector *(see Diagram A)* into the Cloud9 **CloudHub** Power Supply Input.

Diagram A

2. Install the **Power Cord** *(see Diagram C)* into the **AC Power Supply** *(see Diagram B)* for your Cloud9 **CloudHub** and connect your **Power Cord** to the mains power socket.

Diagram B

Diagram C

CLOUD9 HANDSET INSTALLATION

Cloud9 Handset

Cloud9 CloudHub Underside

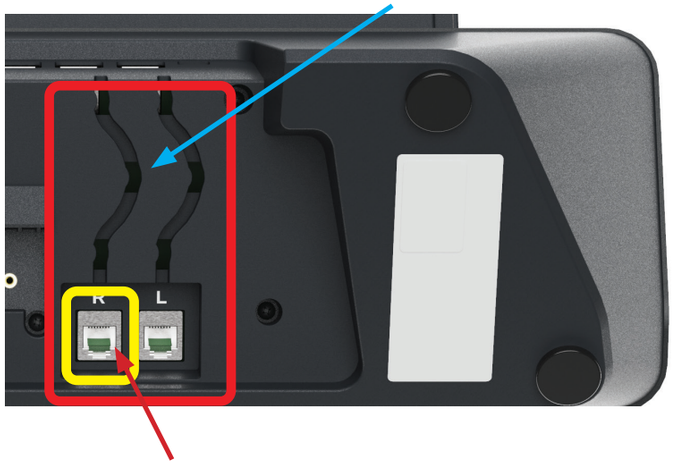

Diagram A

1. Install the Cloud9 Handset(s) RJ11 Connector *(see Diagram B)* into the RJ11 socket located on the Cloud9 **CloudHub** underside and run the cable through the cable channel to ensure the cable(s) are kept tidy and secure *(highlighted by the blue arrow in Diagram A).*

   The handset socket highlighted in yellow in the left diagram is the socket for your "Right Handset" and the second RJ11 socket is for your "Left Handset" if a secondary handset is required *(see Diagram C).*

Diagram C

R = Right Handset
L = Left Handset

CLOUD9 MICROPHONE INSTALLATION

Cloud9 Microphone

Cloud9 CloudHub Underside

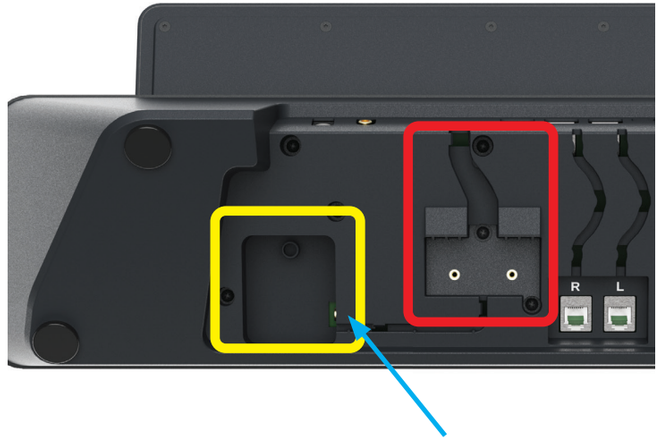

Diagram A

1. Your Cloud9 **CloudHub Microphone** is supplied pre-assembled but requires mounting to the **CloudHub Underside** and the Microphone input plugging into the input jack *(highlighted by the blue arrow in Diagram A)*.

2. Place the Cloud9 **CloudHub** Microphone bracket over the two captive nuts highlighted by the red box, with the gooseneck routed through the channel upwards *(see Diagram B)*.

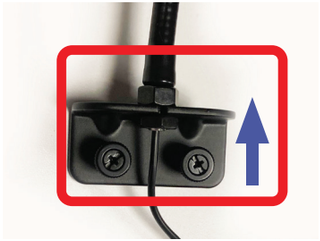

Diagram B

3. With your gooseneck routed upwards, tighten the 2 X Thumb Screws to secure the bracket onto the Cloud9 **CloudHub.**

4. Once the bracket is secure, run the Microphone cable through the channel and connect the Microphone Jack *(highlighted by the blue arrow in Diagram A)*.

CONNECTING CLOUDHUB TO A PC OR LAPTOP

1. Connect the USB-C end of your supplied USB-C to USB-A cable *(see Diagram B)* into the USB-C slot on your Cloud9 **CloudHub** *(highlighted by the red square in Diagram A)*.

Diagram A

Diagram B

2. Connect the USB-A end of your supplied USB-C to USB-A cable *(see Diagram C)* into a spare USB slot on your **Microsoft Windows**-based PC or Laptop *(see Diagram D & Diagram E)*.
