

C9 Trader PC Requirements

Listed below are the recommended hardware requirements for running Cloud9 Trader on a Windows operating system.

Minimum Hardware Requirements for Cloud9 Trader

Component	Requirement
Processor	Intel i5 or i7 with 4 CPU cores (8 multithreaded) at 2.6GHz or above
Operating System	Windows 7 & 10 operating system
.NET Framework	Version 4.6 or above
Memory	8.0 GB RAM or higher
USB ports for audio and button board	Depends on the number of devices used. Cloud9 audio devices for receive (speakers) and transmit (microphone) have been optimized for the application and trading environment.

Additional Recommendations for Cloud9 Trader

- **Cache size 6MB** or greater
- **Limited bandwidth can affect audio quality** on Cloud9. Internet bandwidth usage is dependent on the number of active connections and calls. Minimum recommended bandwidth is 1 Mbps. External factors can impact network performance.
- **Wired access is recommended** if there are issues with spotty or slow WIFI network access.
